

Hold and Locked Printing Options for SAVIN copiers/printers

Allows you to send files to the printer but holds them until you get to printer/copier and tell it to print.

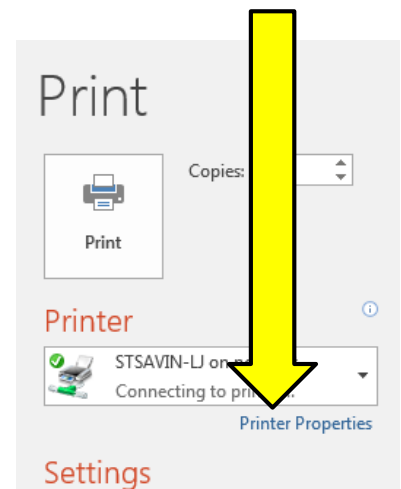

Helpful for

- Printing confidential documents
- Keeping all pages together instead of it getting mixed up with other people's papers
- Printing directly to special paper(colored, cardstock, labels, etc.)
- Need to print a file but can't get to the printer right away and don't want to forget to print the file

After clicking on "Print"

Click on "properties" from the main print screen.

Select which Job Type

•Normal Print:

Prints right away

•Locked Print:

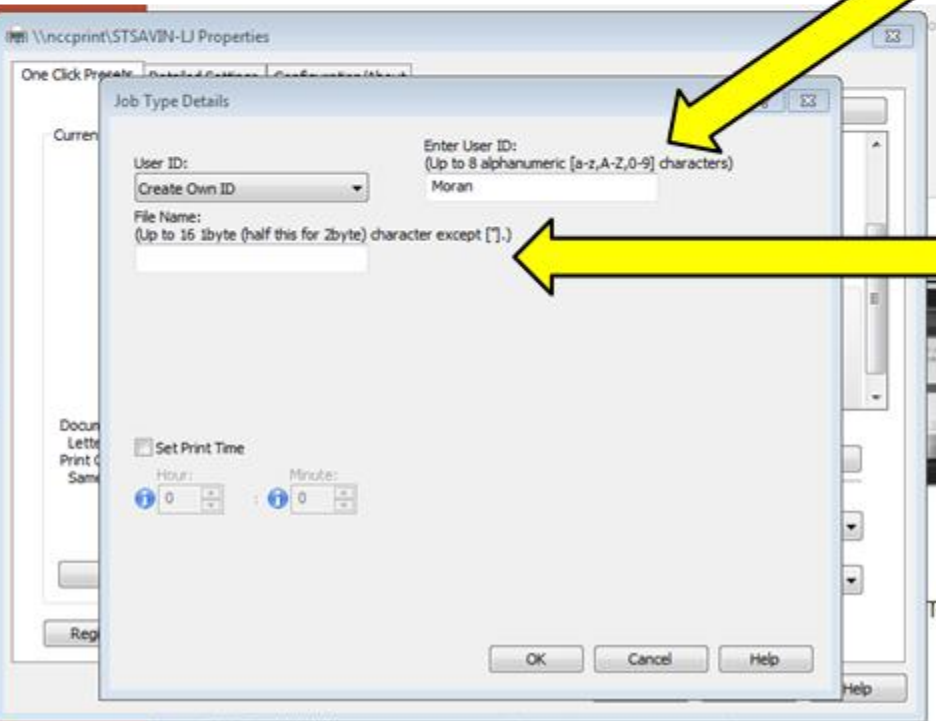

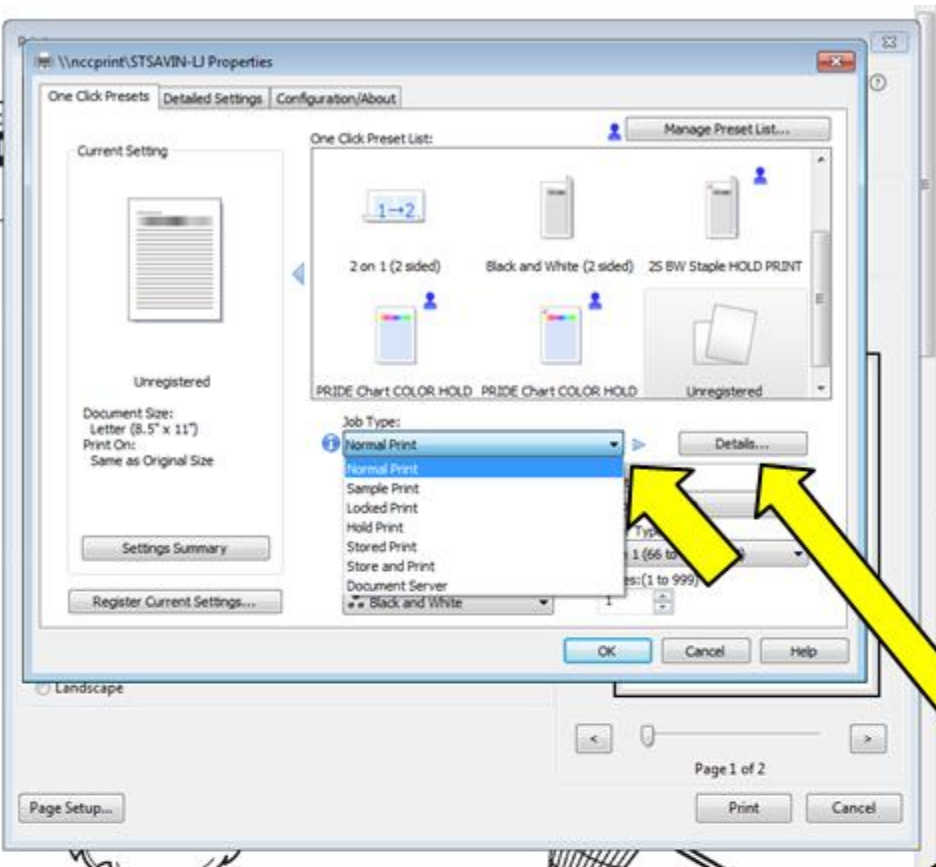

Enter a passcode on machine to print

•Hold Print: Hold items at copier until you select print at the machine

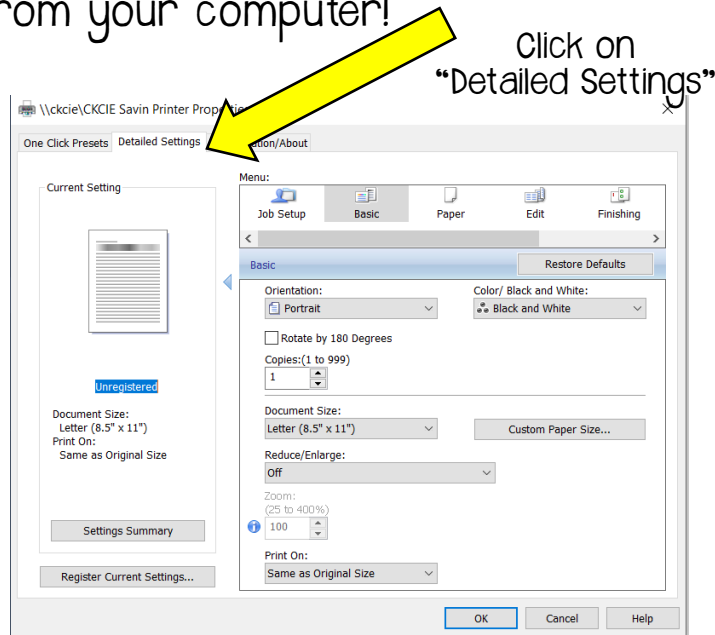

Click On "Details" and enter your name (and a passcode if doing Locked Print)
You should only need to do this the first time

Helpful Tip
You can give it a file name for the kind of paper you need it on
EX: BLU CARDST or 2X4 labels

Clear the file name for the next print job (it will show up under the same file name until you clear it

You have the option to print with the special settings available on the copier right from your computer!

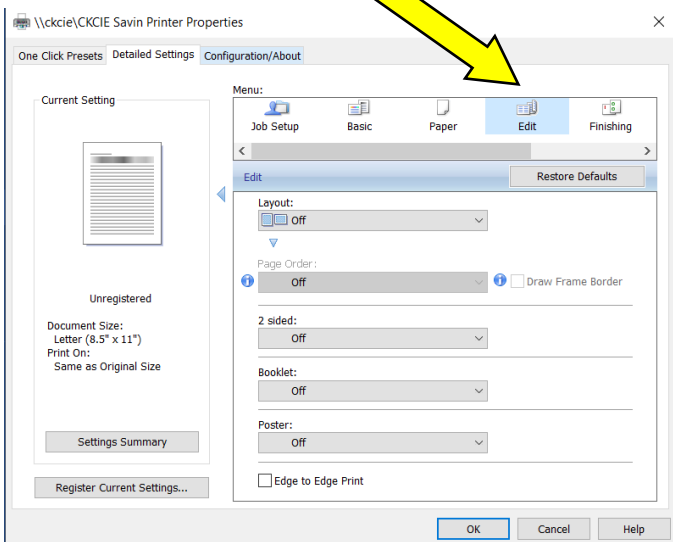

If you need your papers:

- 2 sided
- Special Layouts
- Booklet
- Poster

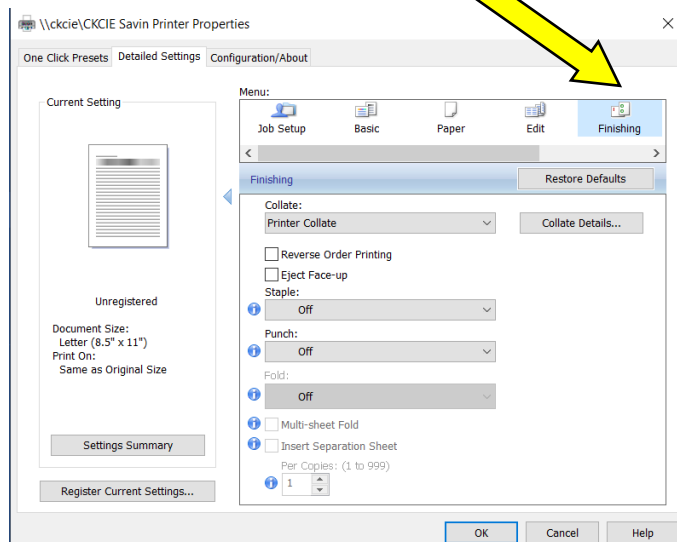

If you need your papers:

- Hole Punched
- Color or Black/White
- Staples
- Collated

Click on "Edit"

Click on "Finishing"

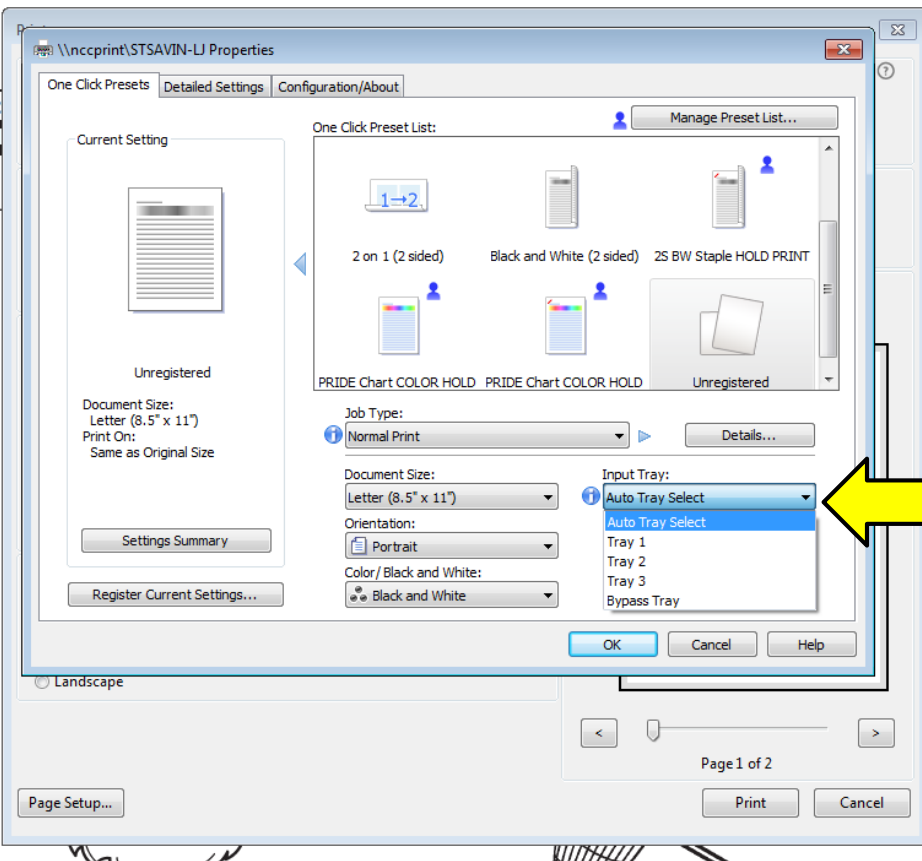

USE THE BYPASS TRAY FOR ANYTHING OTHER THAN "NORMAL" COPY PAPER!
Run colored copy paper through bypass to avoid other's papers ending up on colored paper!

Select which tray you want the paper to come from.

•Auto Tray:
regular white copy paper

•Bypass:
cardstock, colored paper, cut to size construction paper, sticky labels, etc.

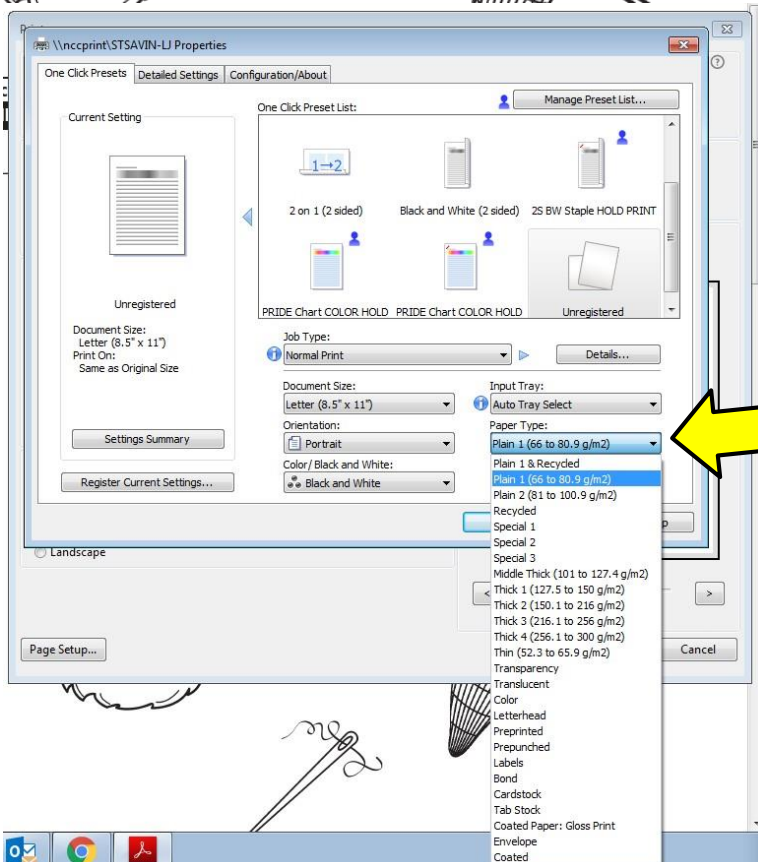

Select paper type.

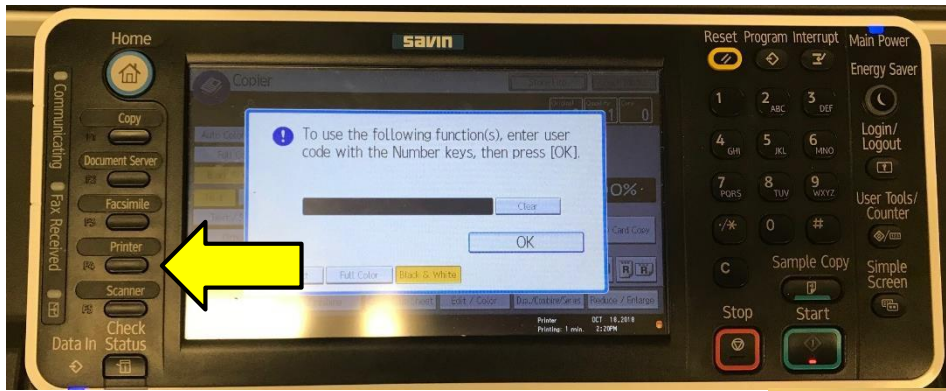

•Plain 1: Regular white paper, colored copy paper

•Thick 2: sticky labels, construction paper (*sometimes* depends on how thick it feels)

•Thick 3: cardstock, construction paper (*sometimes* depends on how thick it feels)

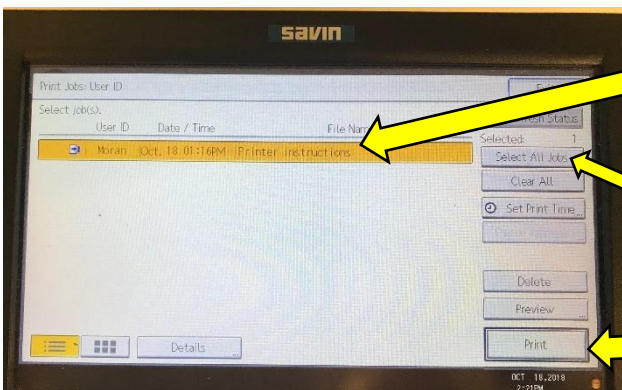

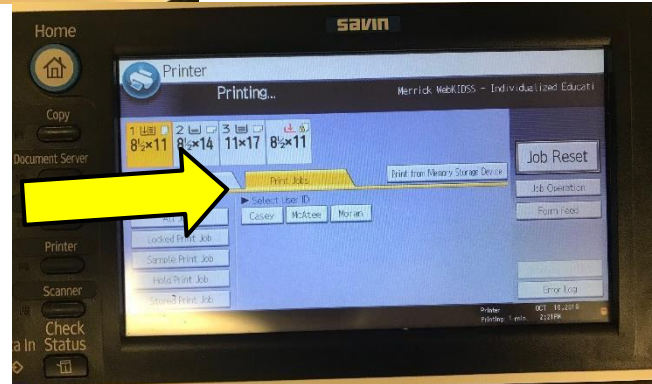

Retrieving sent files from the copier

Press the hard button that says "Printer"

Touch your name on the touch screen

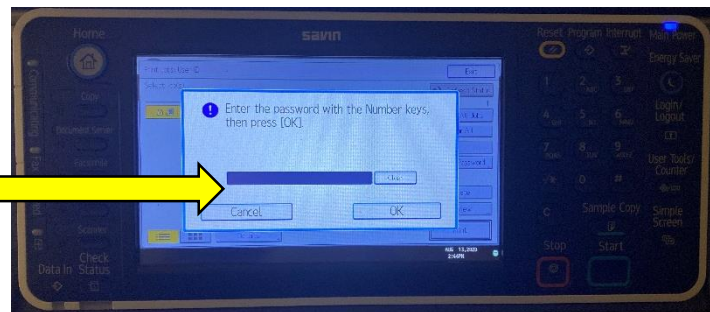

1) Touch the file you want to print
OR

2) Touch "Select All Jobs"

ADD SPECIAL PAPER IF NEEDED NOW

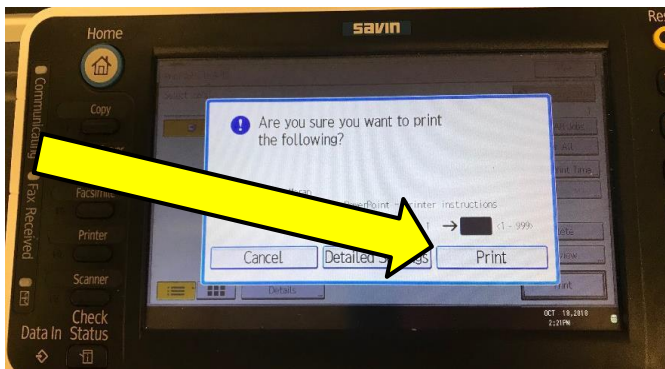

Press Print on touch screen

Enter passcode if needed using the number pad

Touch "Print"

can change some of the detailed settings from the copier if needed

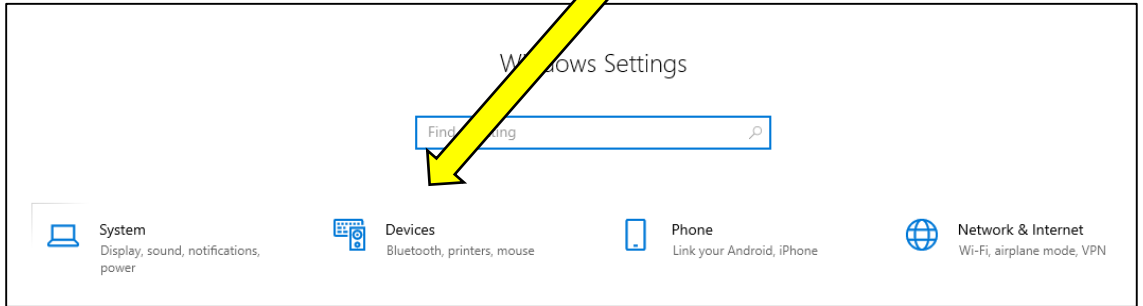

Set Default to Hold Print

Click on the Windows Menu and then Settings

Click on Devices

Click on Printers & Scanners

Find the Savin you print to and click on it to show more options.

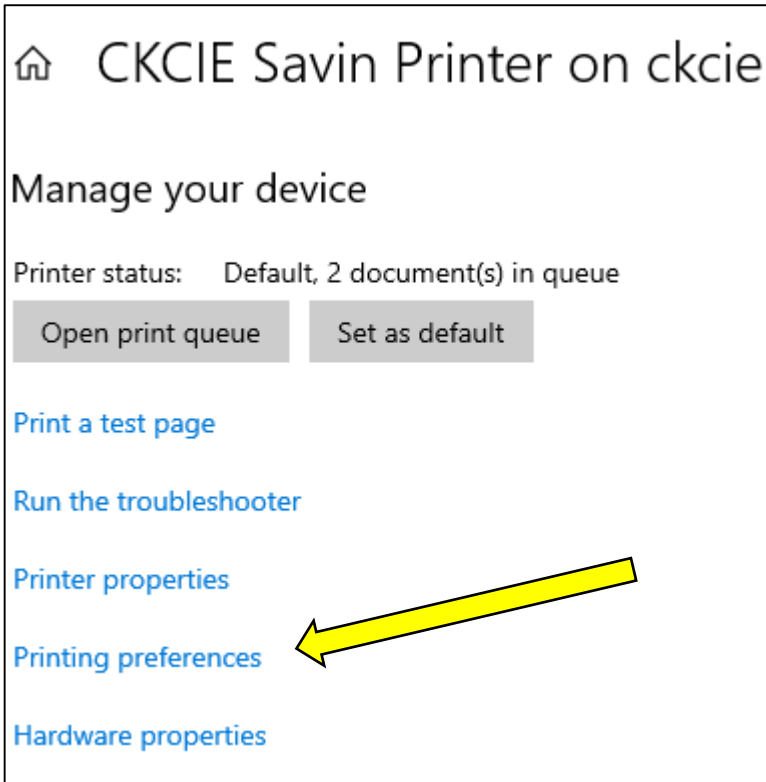

Click on Manage

Set Default to Hold Print

Click on Printing Preferences

Change Job Type to Hold Print(see instruction on PG 2 for the next couple of steps)

Click on Details and enter your name under User ID

Change Color to Black and White

Next:

Click Apply then OK

Exit out of settings. Now your default should be set to Hold Print and Black & White Print
